

After a spate of curious and fruitless false flags intended to incite war between Iran and the United States, we must consider several other related events, at least one of which does not appear to be geopolitical, but certainly is.

To critically consider the Epstein case in the context of a geopolitical event — and not simply as a unique criminal case — let's first consider this rather strange selection of bizarre world events, since 2017:

Trump moves US Embassy in tel Aviv, to Jerusalem

On December 6, 2017, Trump declared that the US embassy in Tel Aviv must re-locate to Jerusalem, to the dismay of just about everyone except major donor Sheldon Adelson and Netanyahu. On its own, the move may be seen as a concession to Trump's major donors.

Donald Trump unilaterally withdrew the US from the JCPOA

On May 8, 2018, Trump withdrew the US from the Joint Comprehensive Plan of Action with Iran, usually seen as another concession to his major donors.

Donald Trump gives the Golan to Israel

On March 25th, 2019 Trump recognized the Israeli annexation of the Golan Heights, even though such recognition is totally illegal by international law.

Trump decided to attack Iran ... then he didn't

On June 20th, 2019 Trump called for a retaliatory strike on Iran in retaliation for a downed US drone, then called it off. This event will be important to note, later on.

Mueller Investigation Winds Up with no Finding of Collusion

On March 23rd, 2019 the Mueller report was submitted with no findings.

Any critical thinker, capable of drawing his or her own conclusions, knows that Trump is not some skilled five-layer chess player battling a corrupt and debauched Globalist world order on behalf of the Deplorables, for ultimate world domination. And furthermore, we know that no president can be such a viable political rogue, of any party affiliation.

We know too that any player at Trump's level is owned by those above him. Period. Full stop. And all conspiracy theories about the Rothschilds and Clintons, George Soros or England's royalty are set alight when an enigmatic and mysterious billionaire arrives on the scene, to possibly topple them all.

Now Epstein symbolizes what Pizzagate promised, that it may have had some substance after all, even if the object of that substance was hopelessly misplaced. Epstein confirms to us that our rulers are just as perverse and debauched as we always expected and suspected them to be.

Epstein is the perfect storm for Elites, thus no one is even asking for his tax returns – if he ever filed one; the media is strangely silent on that. Reports of "tax returns" apparently relate to the 990's filed by his charity, where Epstein for example donated ([\\$50K USD](#)) to the [United Jewish](#)

[Appeal](#) – the very same charity his Bear Stearns boss “Ace” Greenberg graced with millions, years before.

Whatever Epstein’s philanthropy or crimes, he casts the bulk of the western Elite into doubt, regardless of their ideology or party affiliation; with the further possibility that these nefarious characters may be reigned back to earth, just as Icarus fell from the sky... or so the hope goes. Yes, Epstein is the gift that keeps on giving. Now let’s examine how.

By way of introduction [from the Elitist Dalton school](#), from 1976 to 1980 Epstein worked as a lowly options trader [for ‘Ace’ Greenberg at Bear Stearns](#), the firm destined to become a signal icon for the US financial crash of 2008-2009. (The position of options trader is ‘lowly’ because options trading can pay handsomely, but not in the hundreds of millions as Epstein is claimed to possess.)

Epstein’s benefactor, Bear Stearns’ Greenberg, had deep connections to Israel and gave millions to the United Jewish Appeal; his extreme philanthropic generosity also extended to providing Viagra to low income men who could not afford to purchase it, [via the Hospital for Special Surgery](#). But from 1981 on, it was Les [Wexner](#) who funded Epstein’s mega lifestyle.

To document Wexner’s own [strong ties to Israel](#), first consider the Wexner Foundation itself. According to the Wikipedia:

‘The Wexner Foundation focuses on the development of Jewish professional and volunteer leaders in North America and public leaders in Israel. Founded by [Leslie Wexner](#), CEO of Limited Brands and his wife, Abigail Wexner the headquarters are located in New Albany, Ohio with additional offices in New York City and in Jerusalem. In addition to the core leadership programs, the [Wexner Foundation](#) supports other Jewish charities on a local, national, and international level.’

Just prior to Wexner’s acquisition of Victoria’s Secret, Wexner appointed Epstein as wealth manager to his considerable fortune. Epstein was also listed as a Trustee of Wexner’s Foundation by 1994. And it wasn’t until Epstein was indicted for charges on soliciting prostitution in 2007 that Wexner cut ties with his Trustee.

It is clear that any individual of Wexner’s wealth and circumstance must require some form of wealth management, which is usually contracted to a major, respected and reputable financial firm, competent to deal with such matters. So why would anyone give that kind of business to a former lowly options trader like Epstein? Especially after Epstein was reportedly relieved of his Bear Stearns options-trading duties for placing potentially illegal inside trades. The answer must be that Epstein’s recommendation to Wexner must have been a significant one, carrying significant weight.

Whatever the reason for choosing Epstein as wealth manager, there is no doubt that Wexner maintained very close ties to the upper echelons of the Israeli establishment. One such link is

Wexner's Mega Group. The Mega Group was formed by Wexner and Edgar Bronfman and brought together media moguls such as Steven Spielberg and hedge fund managers like Michael Steinhardt, [to promote a positive view of Israel](#) in the media, and provided cover for Israeli propaganda dissemination in the west.

Epstein mentor Wexner's apparent ties to Israeli propaganda and intel policy includes the "Wexner Analysis: Israeli Communications Priorities 2003: A vital new Israeli propaganda strategy document for the period following the war in Iraq." Wexner's work clearly underlines his links not only to top Israeli politicians, [but to intelligence officials](#), too. And who is Wexner's Trustee at this time? None other than Jeffrey Epstein.

Now, recall that Edgar Bronfman and Les Wexner founded the Israeli intel cover op, the Mega Group in 1991. However, the Bronfman-Epstein connection likely began much earlier, with E Seagram's interest in purchasing **St Joe Minerals**, an oil and gold mining company that Bronfman wanted, but St Joe considered a hostile takeover. Indeed, [St Joe said it would liquidate itself](#) before selling out to the Bronfman's. 'Ace' Greenberg's Bear Stearns was heavily involved in trading St Joe at this time, to a point where the SEC¹ halted trades in St Joe, and opened an investigation into Bear Stearns, with regard to insider trading.

The SEC deposed Epstein in the trading matter. No charges were ever filed, and the Bronfman-Epstein links appear to be circumstantial, with Bronfman only appearing in **Epstein's 'little black book'** for some unknown reason — as do many others.

Even so, Bronfman attracted the serious interest of the CIA regarding his involvement in the Israeli-Palestinian conflict during the 1980's, and his high-level Israeli affiliations. Whether Bronfman [worked for — or works — on behalf of the CIA](#) or mossad is unknown, but the connection to the highest levels of power in Israel cannot be denied or disputed.

The point is, persons possessing such enormous wealth — with Israeli connections and influence — are always of great interest to the Central Intelligence Agency. That means a globe-trotting individual as wealthy as Epstein must have garnered the attention of the CIA in a big way. It can be postulated with certainty that the CIA maintains an extensive file on Epstein. But why did the CIA fail to act on what it knew? By default, the implication is that the CIA is implicated in Epstein's crimes... so why doesn't the American public demand that the CIA reveal what it knows about alleged child molester Epstein?

¹ SEC Securities & Exchange Committee, **created** by Congress in 1934 as the first federal regulator of the securities markets. The **SEC** promotes full public disclosure, protects investors against fraudulent and manipulative practices in the market, and monitors corporate takeover actions in the United States.

The Council on Foreign Relations CFR deserves a mention here too, as both Bronfman and Epstein are members. Bronfman was in that place, is it possible that Bronfman is the CFR connection for Epstein? We don't know, and then again, [Bill Clinton is a CFR member too](#), so we shall never know. And we will never know how, why, and by whom Epstein was appointed to the Trilateral Commission.

Epstein's association with heiress Ghislaine Maxwell deserves mention, but their relationship has been extensively covered elsewhere, so suffice to say that the daughter [of Israeli super spy Robert Maxwell](#) was a close confidant of Jeffrey Epstein.

Lest we ignore the elephant in the room, consider Jean Luc Brunel who operates [an agency for young models in Tel Aviv](#). According to reports, Brunel received [\\$1M USD from Epstein in 2005](#) when Brunel founded his agency MC2. And Israel has always used sex and honey traps [as a means to entrap and control](#).

'Ace' Greenberg... Les Wexner ... Edgar Bronfman ... Ghislaine Maxwell... Jean Luc Brunel... and [even Ehud Barak](#), a pattern emerges. A pattern with very strong ties to Israel and the Israeli lobby. These are all fierce champions of Israel with an Israeli-centric agenda. And they have all been involved to some degree with Epstein.

But does that mean Epstein [is a mossad intelligence operative](#) as David Steele claims?

Epstein's case has been revived one dozen years subsequent to his original conviction— by none other than James Comey's daughter. Significantly, arch-Israel supporter [Alan Dershowitz](#) — and former friend and counsel to Epstein — indirectly provided documents in the now politically-oriented sacrifice of Epstein, [which may have contributed](#) to his arrest. And all this is just

subsequent to the release of the Mueller report, where no campaign collusion was found, what is the connection?

To discover the connection, we must finally return to the sequence of events with which we began, namely the embassy deal, the JCPOA, the Golan giveaway, and tensions with Iran — and thus Trump's appeasement of Israel.

Recall that Trump ran his campaign early on as if he did not need the Israel lobby's support, [and famously said so](#), a campaign moment that sat well with his base, and may have contributed to his electoral win. He also refused to say whether he supported Jerusalem as the "undivided capital" of Israel. That was all to change. In that context, Trumps' eventual appeasement of Israel seems strange.

All that remains is what we see, that the Epstein case coincides with enormous Israeli pressure in the form of political blackmail to force Trump and thus the United States to attack Iran, on Israel's behalf. But even that conclusion is too simplistic.

Originally it seemed that the Epstein affair coincided with Israel's intent for war with Iran; however, the Neocons, Neoliberals, and Statists who truly hold power may be standing down on Iran because they have already made their point. The true goal, the real goal, is symbolized by the children that these Elites love to abuse: that is, absolute power and control. Power and control by the few. Control so deep, that even 911 is rendered irrelevant in its plotting and execution.

In other words, it's not whether Israel and the Deep State can force the US to war with Iran or not, but that they have absolute power to do so. The political class ratcheted tension with Iran and evoked and provoked similar nonsense to that which led the US to invade and occupy Iraq, only to prove their point once again: that the Political Class has absolute control over the West. As [Umberto Calvini's character said in the film, 'The International'](#): "No, no, this is not about weapons sales... it is about control. You control the debt, you control everything." But we must modify that statement to say it is about controlling the debt *and the dirt* — control the debt and the dirt, then you control everything.

Recall when Trump said he decided to attack Iran and then decided not to. We must assume by what we see, that the decision whether to attack Iran or not was made for him. And ultimately that theory must rely on the premise that Israeli intelligence services *really do* have something on Trump. Do they? We shall see, especially if there is an attack.

But the major underlying point here is only about power and control ie who has it, and who does not. Right now, it appears that child molesters have had political power and control, for a long long time.
